# PRODUCTION LINE INSTALLATION. INTEGRATION. OPTIMIZATION.

Food and beverage manufacturers are nimbler and more dynamic than ever before, continually evolving to get the most out of their production lines. These market leaders align themselves with customer-centric partners who get the job done. The best R&D, the most efficient capital equipment, and the most precise production processes all contribute to their success. The other key component is to source turnkey service providers, leveraging expertise wherever possible. Incline Industrial Services' deep industry experience is meeting customers challenges by installing or retooling production lines to deliver the most effective solutions possible.

## UNDERSTANDING THE BIG PICTURE

Incline Industrial is your turnkey partner for custom millwright services, heavy equipment rigging and steel fabrication. Whether you're installing new equipment or integrating a new production line, Incline Services will orchestrate accuracy and excellence in your next project.

Our experience and capabilities have given us a big-picture vision for production lines. For over 20 years we have worked with capital equipment of every major manufacturer, obtaining the knowledge to make your line work together better. But we don't stop there. We can fill in the processing gaps, custom fabricate your material handling systems, elevated walkways, conveyors, and feeders – whatever solution is needed to get the most out of your production processes.

# CUSTOMER COLLABORATION: OUR TEAM IS YOUR TEAM

Our engineers and project managers have deep experience in virtually all aspects of the food and beverage manufacturing industry and continually contribute valuable perspectives, especially on large-scale projects. In collaboration with your production team or facility managers on a design/build project, we can mitigate potential issues before they happen while benefitting your project both technically and financially. Plus, when we're advising your team on the front end of your project, we can steer you towards the best capital equipment choices to optimize your line.

# WHERE SAFETY COMES FIRST

At the core of all projects, safety is of the utmost importance. We use stringent protocols and procedures to ensure we are performing at the highest level of safety. From planning through execution, we work with your team every step of the way.

## FOOD SAFETY IN OUR FABRICATING

Our stainless steel fabrication (304, 304L, 316) and integration services meet ASME BPE, GMP, and 3A sanitary standards. By engineering 'non-recess' joints and grinding all surfaces, we help our clients comply with stringent industry regulations for sanitary manufacturing processes.

# MILLWRIGHT SERVICES WITH A DEPTH OF EXPERIENCE

We specialize in single machine installations to complete plant installations and relocations. Installation of delicate production equipment is a complex job that requires experience and expert management. Incline construction through precision planning and execution has delivered hundreds of projects on time and within budget. We take pride in our reputation for meeting customer needs.

Whether designing and planning your project, or working from your plans, we will meet your expectations head on. When there are perceived challenges, we will provide the right solutions. When there is a need for improvement, our proven expertise will provide a path. When your line needs enhancements, our fabrication talents can be put to the task.

## INCLINE MILLWRIGHT VAST SERVICES INCLUDE:

- Engineering
- Metal Fabrication
- CNC and Plasma
- Welding
- Permitting
- Rigging
- Installation
- Plumping and hydraulics
- Alignment
- Testing
- Maintenance
- Repair

# MACHINE RIGGING & PRODUCTION OPTIMIZATION

Having loaded, moved, unloaded, and installed machines weighing more than 100 tons, the Incline team has extensive machine rigging expertise. Across the plant floor or the country, rigging is not just a go-by-the-book skill, it's a unique skill that requires experience. And, Incline has an extraordinary rigging portfolio. Through precision planning and execution, we've delivered hundreds of projects on time and on budget while adhering to OSHA and related safety protocols, with an ongoing commitment to safety.

## OUR FACILITY IMPROVEMENT AND OPTIMIZATION SERVICES INCLUDE:

- Industrial engineering
- Rigging and crane work
- Rooftop unit support frames
- Skid installation/startup
- Structural construction
- Production line integration
- Commissioning and validation
- Process and utility piping

# EQUIPMENT FABRICATION & STRUCTURAL WELDMENTS

Our fabrication experts comprise of a diverse team of welders, machinists, and fabrication craftsmen who take great pride in giving form and function to sheet metal, stainless steel and iron. We can build to print or engineer a solution whether fabricating in the shop or in the field. Our manufacturing facility houses the equipment required for complete fabrication and finishing.

## A FEW OF OUR SPECIALTIES INCLUDE:

- Processing platforms
- Access platforms
- Stairways and walkways
- Material hoppers and bins
- Conveyors
- Mixing tanks
- Machine bases
- Replacement parts

# EXPERTISE

# ASK OUR CUSTOMERS ABOUT HOW INCLINE ELEVATES PRODUCTION LINE PERFORMANCE

While our customers span the manufacturing world, Incline is known in the food and beverage processing industry for our expertise in fabricating, installing, and optimizing hygienic equipment and stainless steel facility structures. Our engineers have subject matter expertise in key areas of food processing, including bulk material handling, frozen, ambient, and liquid processing, packaging, and sanitary design, including FDA food safety compliance.
